

## **Occlusion plan : a reference in Orthodontics and Maxillofacial Surgery**

**Eric SOLYOM**

### **Institution :**

- Private practice, Paris (FRANCE) Toulouse (FRANCE)

The occlusion plan reveals the whole craniofacial skeleton according to the function, facial growth and aesthetic criteria. Its function has clearly been defined by Professor Jean Delaire. Its imbalance in case of a dentofacial dysmorphism invites us to define its causes and to treat them.

Its restoration, associated to the treatment of the etiological causes is necessary to obtain a functional occlusal, muscular and ventilation result and a well-balanced aesthetic result.
