<sup>3</sup> Service de Chirurgie Maxillo-Faciale et Stomatologie, Maladies Rares  
CHU de Nantes, France

The objective of this table ronde is to bring together different specialists involved in the management of swallowing disorders, to discuss the prevention of dental malocclusions in children and the rehabilitation of oro-my-facial functions in adults after orthodontic treatment associated or not with jaw surgery. The different aspects of the management of facial dysfunctions will be presented by an oro-maxillo-facial physiotherapist, a speech therapist, an orthodontist and a surgeon.
